

Building Intelligence with Submetering Solutions    

A complete utility metering platform for integration and access to data

We resolve meter and energy management compatibility issues

Introducing QMC's Integrated Metering Platform:

- Seamlessly network existing equipment and software with new installations
- All encompassing – all meter types for all utility types, and all communication platforms are compatible
- All levels of building metering can be integrated: key load, building level and tenant consumption
- We solve any metering problem with a property-specific solution

New and existing equipment integrate easily when utilizing our custom submeter solution.

We have over 20 years of experience in the submetering industry. Leading Canadian commercial real estate developers and property managers turn to QMC for guidance because we are not manufacturers but solution providers.

Integration is our specialty. Our team is uniquely qualified to deliver customers the best integrated metering solution for their project. We provide clients with solutions that utilize modern technology, to solve their modern challenges.

Confidence in Meter System Integration

QMC is a leader in integrating commercial building metering and energy management systems. Be sure your system will deliver what you need.

Our Integrated Metering Platform can successfully integrate:

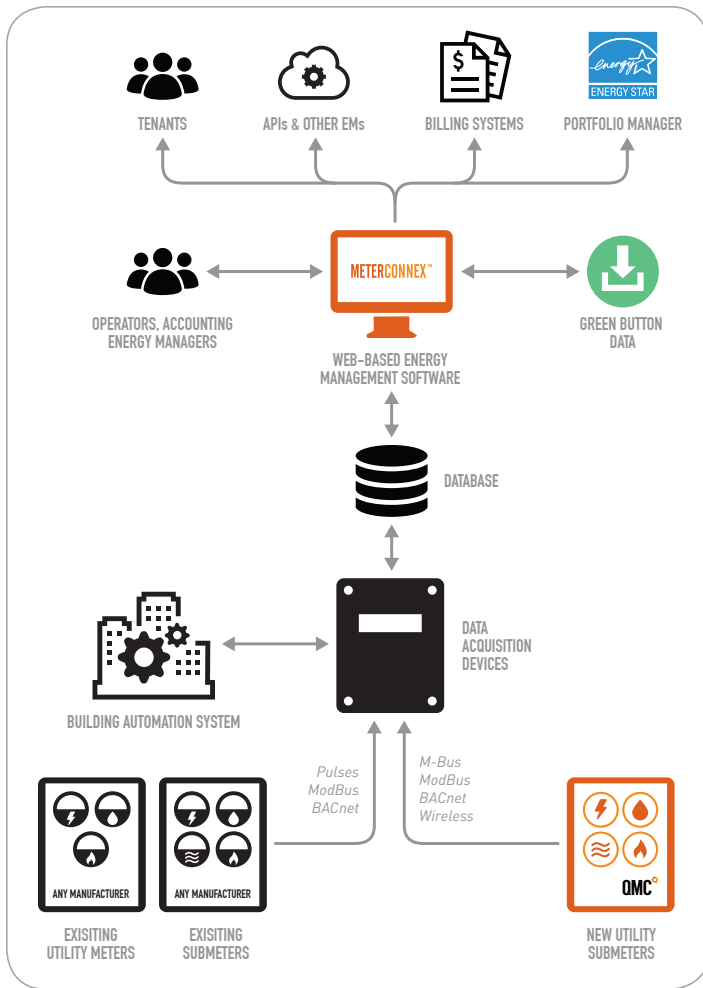

- All utilities: electricity, water, thermal energy & gas
- All meter manufacturers, new & existing where possible
- All communications systems
- All energy management software, new & existing where possible

This complete solution solves the problem of mixing new and existing equipment, from project conception, completion, to the ongoing management of utility services.

The Integrated Metering Platform is the best solution for your building from design to service:

- Complete metering system design and project management for both new construction and retrofits
- High quality products – best-in-class hardware for all metering devices
- Accurate web-based meter data collection reporting platform MeterConnex™; data is stored in the cloud
- Flexible, open protocol systems; we work with other manufacturers and system providers
- Easy, web-based access to data and reporting for tenants and property managers
- Customer centric; QMC's long history of continuous customer support, service and innovation
- Measurement Canada Quality Assurance Program accreditation - Accredited Meter Verifier

How a QMC Integrated Metering Platform works:

Managers of multi-residential, institutional and commercial properties require accurate meter measurement and data for tenant billing and energy management.

QMC's Integrated Metering Platform delivers:

- Reading and collecting meter data
- Consumption reports for cost recovery through tenant billing
- LEED metering and reporting
- Key load management
- Shared Services metering
- Whole building metering
- Tenant engagement
- Benchmarking
- Real time monitoring with alert capability
- Building automation
- Web-based energy management software
- Energy Star Portfolio manager
- Open protocol non-proprietary solution

The Integrated Metering Platform is a platform that includes best-in-class utility meters. Promote utility conservation by implementing:

- Electricity metering including EV charging stations
- Hot & Cold encoded wireless water meters
- Thermal energy metering
- Gas metering
- Automated meter reading (AMR)

MeterConnex™

Our Integrated Metering Platform includes MeterConnex™, QMC's web-based reading and reporting data collection service. Because it is meter-agnostic, we can use the best meter for your building, no matter the manufacturer. MeterConnex™ will retrieve meter data and provide a consistent, easy-to-read format for reporting purposes. The ability to create, view and download reports relevant to your operation make MeterConnex™ the best choice for building owners and managers. Secure, online access to data and reports is available to property managers, accountants, building operators, consultants and occupants.

Confidence with Canada's Industry Leader

QMC leads the industry in intelligent submetering solutions. We provide options to help building owners and occupants conserve energy and save money through the accurate submetering of a building's utilities: electric, water, thermal and gas. Vancouver-based with offices across Canada, QMC has over 20 years of hands-on experience in the field and working with utility meter data.
